

GENERAL CAPSICUM GROWING GUIDE

FOLIAR FEEDING		CAPSICUM DISEASES	REMEDY
Sowing	Transplanting	Seedling	Thiamethoxam
1 st two weeks	Kic start - 2ml/L water Fosfaspray - 5g/L water Sporekill - 0.5ml/L water	Fusarium, Pythium Rhizoctonia	Sporekill Fosfaspray Kic start
1 st Month	Nitrospray - 2ml/L water Hyperfeed - 5g/L water Hygroboost Flo- 2ml/L water Seamaxx - 2.5ml/L water	Foliar diseases	
2 nd Month	Hyperfeed - 5g/L water Sporekill - 1ml/L water Calmabon- 2ml/L water Liquicop - 2ml/1L water	Bacterial spot/Mosaic	Sporekill
3 rd Month	Sporekill - 1ml/L water Calmabon- 2ml/L wate Coptrace - 2ml/1L water	Downey mildew	Liquicop
		Bacterial wilt	Hygroboost Flo
		Blossom end rot	Calmabon
		Soil borne diseases	
		Fusarium/pithium	Perlka
		Nematodes	Mustard caliente
		Post-harvest	
		Black and grey mould	Vapour guard
		Anthraxnose	Avoshine
		General Pests	
		Thrips and aphids	
		White flies	Acaricides
		Mites	Chlorantraniliprole
		Leaf miners	
		Tomato fruit worm	
		Others	
		Weeds	Hygrosate

Size / ukubwa

Days to harvest / siku za kukomaa

75 days

Transplanting / hupandwa miche

Sowing Season / msimu wa kupanda

Depth / undani wa kupanda

1 cm - 2 cm

Spacing / umbali mmea kwa mmea

40 x 50 cm

Watering / kuweka maji

Water regularly / mara kwa mara
